-
- *Bradley Hughes Concrete is steel-reinforced and is available in 1 ½" or 2" thicknesses or with a 3" apron*
 - *Exposed concrete surfaces are top coated with our proprietary water-based, low-VOC sealer in either matte or high gloss finishes. While the sealer is food-safe, UV and stain resistant, the concrete color may change slightly over time when exposed to sunlight, outdoor environments or harsh chemicals.*
 - *Slight color variations can occur from lot-to-lot and may not be an exact match to showroom samples.*
 - *Contact your BRADLEY HUGHES representative for more information.*
